The Conglobal Advantage

Network – ITSC operates over 70 facilities in the Americas offering a wide range of services.

Depot Locations– We have the largest network in North America providing customers with strategic locations near major port areas and inland distribution hubs.

Reliability - Our depot services provide a level of reliability that customers depend on to help them better forecast their equipment utilization.

Experience – We put our 40 years of experience into helping our Customers find the most cost effective and operationally efficient solution to their intermodal service needs.

Repair Parts Inventory – We carry over \$3.5 million worth of repair parts inventory for critical repairs and to minimize out-of-stock situations.

Container Sales - We stock over \$4 million in new and used containers across the country to be able to provide you with the container you need quickly.

What do we offer with our depot services?

Storage and Handling

We provide secure storage facilities at major port areas and inland central distribution locations with a total capacity of over 200,000 TEU. ITSC offers wheeled and stacked storage. Some of our locations are bonded facilities with the ability to receive, secure, and hold arriving in-bond loads.

Maintenance and Repair

We perform timely maintenance and repair services according to the highest industry standards. All our mechanics and technicians go through training on the industry's latest repair standards.

Container Modifications

We perform container modifications large and small for customers at depots across the country. The modified containers are deployed across a multitude of businesses from industry to housing.

Latin America

Altamira, Mexico - Lazaro Cardenas, Mexico
Manzanillo, Mexico - Veracruz, Mexico
Limón, Costa Rica

Electronic Data Interchange (EDI) Service

ITSC has made tremendous investments in our information technology systems to manage, track, and communicate with our customers on their equipment. Our robust EDI capabilities enable us to seamlessly communicate critical information with our customers. We also offer paperless handheld devices to provide real-time repair estimates.

Drayage

ITSC is expanding our regional intermodal drayage services and we can package this with other depot services for a customized solution to meet your needs.

Mobile Repair

Our mobile repair trucks go to the ports, rail ramps, and truck yards to do repairs that get equipment back into service, increasing equipment utilization.
